STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

JANUARY 1, 1943

Stocks Smaller Than Year Earlier

All types of leaf tobacco owned by dealers and manufacturers in the United States and on the Island of Puerto Rico, on a reported weight basis, combining unstemmed and stemmed leaf, totaled 2,931,917,000 pounds on January 1, 1943. On the same date a year earlier the total was 3,040,439,000 pounds. In spite of the entry into stocks of approximately 1,050 million pounds of the 1942 crop during the present selling season to January 1, 1943, compared with the entry of about 870 million pounds of the 1941 crop during a similar period of the 1941-42 season, stocks on January 1, 1943, were less than a year earlier by 58,522,000 pounds. The 1942 crop was estimated at 1.4 billion pounds, whereas the 1941 crop was 1.3 billion pounds. The decrease is attributable to increased consumption on the home front, increased consumption by the American forces in foreign lands, and requirements for Lend-Lease. From March 11, 1941, the effective date of the Lend-Lease Act, to January 1, 1943, 305 million pounds of all types of tobacco were shipped under Lend-Lease.

Increased Demand For Light Tobacco, Especially Flue-cured

The reported weight of all flue-cured stocks totaled 1,602,820,000 pounds, compared with 1,555,061,000 pounds on January 1, 1942. Stocks of Type 11 were 372,858,000 pounds; Type 12, 596,789,000 pounds; Type 13, 319,818,000 pounds; and Type 14, 113,355,000 pounds.

During the past quarter - October 1, 1942, to January 1, 1943 - flue-cured stocks were increased by 299 million pounds from sales of the 1942 crop. The 1942 crop was larger than that of 1941 by 175 million pounds. All flue-cured markets were closed by December 11, 1942. This is the second successive year in which sales of flue-cured tobacco have been completed within the calendar year in which it was grown. Sales during the quarter ended December 31, 1942, were regulated by Maximum Price Regulation No. 228, of the Office of Price Administration. This regulation, which succeeded Temporary Maximum Price Regulation No. 21, became effective September 22, 1942. Each purchaser had a ceiling based on his past marketing activities, except that no purchaser had a ceiling of less than 34.86 cents. Purchases by the Commodity Credit Corporation and for export were exempt. Thus prices were free to rise above the 34.86-cent level.

Flue-cured tobacco is the most important type used in the manufacture of cigarettes. Consumption of cigarettes indicated by tax-paid withdrawals totaled more than 63 billion during the quarter, October 1, 1942, to January 1, 1943, compared with 53 billion during the last quarter of 1941. Tax-free cigarettes for the American forces on foreign fronts would increase the consumption indicated by tax-paid withdrawals by a sizable percentage. In addition to the increased use in the manufacture of cigarettes, by far the larger part of total Lend-Lease exports of leaf is flue-cured.

Burley stocks on January 1, 1943, totaled 722,239,000 pounds or about 84 million pounds less than a year earlier. Maryland stocks, on the other hand, are larger by more than 2 million pounds. Burley and Maryland are used largely in the manufacture of cigarettes and light smoking mixtures. Increased consumption of cigarettes is responsible for the decrease in total light air-cured stocks. Less than 1 million pounds of Maryland tobacco were exported in 1942, compared with a pre-war average of about 5 million pounds. Burley tobacco has never been an important export type. Sales data indicate that the 1942 Burley crop was about 343 million pounds compared with an earlier estimate of 331 million pounds.

Stocks of foreign-grown cigarette and smoking tobacco, Type 90 (Turkish and other), were 76,792,000 pounds on January 1, 1943, or about 14 million pounds less than Oriental stocks on January 1, 1942. The decrease during the last quarter has been about 8 million pounds. Foreign cigarette and smoking tobacco stocks were lower than on any January 1 since 1938 when they totaled 70,366,000 pounds. However, the large stocks on January 1, 1939, to January 1, 1942, were probably the result of attempts to build up stocks of Oriental tobaccos in the United States, in view of uncertain import conditions. The import situation remains uncertain.

Increased Uses Of Dark Tobacco For Byproducts

Fire-cured stocks totaled 162,137,000 pounds on January 1, 1943, slightly more than a year earlier. Type 21 totaled 29,804,000 pounds; Type 22, 93,498,000 pounds; Type 23, 36,687,000 pounds; and Type 24, 198,000 pounds. Dark air-cured types totaled 61,107,000 pounds, of which stocks of Type 35, One Sucker, were 32,954,000 pounds; Type 36, Green River, 25,918,000 pounds; and Type 37, Virginia sun-cured, 2,235,000 pounds. Total dark air-cured stocks were 10 million pounds less this year than on January 1, 1942. The 1942 production of dark tobaccos is estimated as slightly higher than in 1941. The increase, however, is not sufficient to offset increased uses in the domestic manufacture of snuff and chewing tobacco and increased uses in the manufacture of nicotine (chiefly for insecticides) for the food program in the United States and for Lend-Lease shipments to Allied countries whose supply of insecticides from other sources has been cut off or reduced. Nearly 2 million pounds of dark leaf were exported under Lend-Lease during the last quarter of 1942.

Cigar-leaf Stocks Slightly Less Than Year Earlier

American cigar-filler stocks held by dealers and manufacturers on January 1, 1943, totaled 160,800,000 pounds, compared with 153,423,000 pounds a year earlier. Stocks of Type 41, Pennsylvania Seedleaf, were 92,715,000 pounds; Type 42, Gebhardt, 20,499,000 pounds; Type 43, Zimmer, 7,521,000 pounds; Type 44, Dutch, 5,959,000 pounds; and Type 46, Puerto Rican (in the United States and on the Island), 34,106,000 pounds.

Cigar-binder stocks totaled 116,172,000 pounds, of which stocks of Type 51, Connecticut Broadleaf, were 19,753,000 pounds; Type 52, Connecticut Havana Seed, 28,917,000 pounds; Type 53, New York and Pennsylvania Havana Seed, 2,300,000 pounds; Type 54, Southern Wisconsin, 29,586,000 pounds; Type 55, Northern Wisconsin, 34,617,000 pounds; and Types 56 and 45, Georgia and Florida sun-grown, 999,000 pounds.

Total domestic shade-grown stocks of 15,134,000 pounds were only slightly below stocks a year earlier. Type 61, Connecticut shade-grown totaled 9,828,000 pounds, and Type 62, Georgia and Florida shade-grown 5,306,000 pounds.

Foreign-grown cigar-leaf stocks on January 1, 1943, totaled 19,939,000 pounds, slightly above the stocks a year earlier. Of the total, Type 81, Cuba (Havana) stocks were 12,667,000 pounds; Type 82, Sumatra and Java, 864,000 pounds; and Type 84, other foreign-grown cigar-leaf, 381,000 pounds. In quantity, increased stocks of Cuban tobacco offset in large measure, the greatly reduced stocks of Philippine and other foreign-grown cigar leaf. Sumatra and Java wrapper in the hands of dealers and manufacturers this year is slightly above what it was on January 1, 1942. This evidently indicates greater withdrawals from the free-trade zone stocks of the Netherlands East Indies Produce Corporation by the dealers and manufacturers and not an actual increase of Sumatra and Java leaf in the country. Total cigar stocks of all types as of January 1, 1943, totaled 312,045,000 pounds; the total on January 1, 1942, was 314,538,000 pounds.

Tax-paid withdrawals of cigars during the quarter ending December 31, 1942, totaled 1,792 million cigars, compared with 1,673 million in the same quarter of 1942, or an increase of 7 percent. Tax-free cigars sent to foreign countries would increase this percentage somewhat. Increased consumer incomes have caused significant increases in consumption of cigars, especially of the more expensive classes. A substantial increase continued in the manufacture of scrap chewing tobacco.

Stocks of miscellaneous types on January 1, 1943, were 2,499,000 pounds, compared with 2,795,000 pounds on the same date in 1942. Type 71, Eastern Ohio, stocks were 703,000 pounds; Type 72, Perique, 665,000 pounds; and Type 73, other miscellaneous domestic, 1,131,000 pounds.

Figures quoted for type totals in this summary statement are the sums of unstemmed and stemmed leaf as reported. Tables in the body of the report show stocks on a farm-sales-weight basis, and stocks owned by dealers and manufacturers separately. Stocks are also shown in detail, subdivided according to recognized groupings. Attention is called to Table 4(a), showing the revised figures on dealers' and manufacturers' stocks separately for October 1, 1942.

EXPLANATION OF GROUP SYMBOLS

GROUPS OF TYPES 11, 12, 13, and 14:
- A-Wrappers
- B-Leaf and smoking leaf
- C-Cutters.
- X-Lugs and primings
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 21, 22, 23, and 24:
- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 31:
- A-Wrappers
- B-Bright leaf, red leaf and tips
- C-Lugs and Cutters
- X-Trash and flyings
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 32:
- B-Heavy leaf or dull crop
- C-Thin leaf or bright crop
- X-Seconds and ground leaves
- S-Scrap.
- N-Nondescript.

GROUPS OF TYPES 35, 36, and 37:
- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 41:
- B-Binders or tops
- C-Fillers (farm wrappers)
- X-Stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 42, 43, and 44:
- C-Fillers (farm wrappers)
- X-Stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 46:
- C-Superior
- X-Inferior
- Y-Defectuoso
- S-Scrap (Picadura)
- N-Nondescript

GROUPS OF TYPES 51, 52, and 53:
- A-Wrappers
- B-Binders, seconds and brokes
- C-Fillers and short darks
- X-Stemming grades
- Y-Sand-leaf fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 54 and 55:
- B-Binders
- C-Fillers
- X-Stemming grades
- Y-Sand-leaf fillers or bottom leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 56 and 45:
- B-Binders
- C-Fillers
- X-Stemming grades
- Y-Ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 61 and 62:
- A-Wrappers
- B-Stout wrappers and binders
- C-Fillers or tips
- X-Filler brokes
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 81, 82, and 83:
- A-Wrappers
- C-Fillers
- S-Scrap

1/ Subject to revision.

2/ See supplementary Burley report on page

3/ Includes existing stocks of filler tobacco of type 45, from crops prior to 1940. Beginning with the 1940 crop, it is assumed that the complete transition from filler type to binder type tobacco had taken place.

4/ Does not include stocks owned by Netherlands Indies Produce Corporation held in free trade zone and in transit.

* Revisions in October 1 report.

1/ For factors used in converting various weights for types 11-62, see table 3 on page 8 of U. S. Department of Agriculture Circular No. 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage. January 1 figures subject to revision.

2/ A factor of 1.11 was used for converting unstemmed stocks to farm-sales-weight equivalent.

3/ A factor of 1.333 was used for converting stemmed stocks to unstemmed equivalent; a factor of 1.09 was used for converting stocks on unstemmed basis to farm-sales-weight equivalent.

4/ A factor of 1.205 was used for converting stemmed stocks to unstemmed equivalent.

5/ No conversion was made of unstemmed stocks.

* Revisions in October 1 report.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of The Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis. Figures are as reported to date; no revisions of this table will be made.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the island of Puerto Rico.

4/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone and in transit.
